04 Methodology & Sources

What qualifies as a commitment

Only **measurable** statements — a number, %, ratio, ₹/$ figure or a dated milestone. Generic or aspirational commentary is rejected. One promise per row, with a verbatim ≤25-word quote.

How status is judged (deterministic rules — the model only retrieves)

- **MET** — delivered or exceeded the target
- **PARTIAL** — close but below target / a milestone slipped within grace
- **MISSED** — failed, incl. a date the company later pushed past the promised window
- **NYT** — outcome not yet reported within the verification window (excluded from scoring)

Confidence & the credibility score

H = hard numeric · **M** = directional · **L** = aspirational. Credibility = confidence-weighted delivery over testable promises (MET=1, PARTIAL=0.5, MISSED=0; H=1.0, M=0.8, L=0.6); bands A≥75 B≥60 C≥45 D≥30 E<30.

The verification window

Outcomes are verifiable only through **Q4FY26** (reported 2026-05-01). Later targets are therefore **NYT**. *Full retrieval · openai, mistral, gemini, groq.*
