COMMITMENTS BY REPORTING QUARTER

ROOT CAUSE OF MISSES & SHORTFALLS

A mixed delivery record — chiefly supply chain; 56 later targets still not yet testable.

Of the 1 dated commitment that came due, 0 landed on time and 1 slipped right. The slippage timeline is overleaf.

CREDIBILITY SIGNALS — WHERE THE RECORD SHOWS

- **19%** of the verdict rests on hard Tier-1 (binary) outcomes.
- **1 quietly dropped** — reaffirmed, then went silent once due (top red flag).
- Wide beats on **13/22** guided metrics — a conservative bar.
- **50%** of explained misses blamed on external factors.

02 Deadline Slippage & Execution Momentum

Each row is one dated commitment: the amber dot is where it was **promised**, the second dot is where it **actually landed** (its colour is the verdict). Below, the reported EBITDA and margin trend.

Methodology & Sources

What qualifies as a commitment

Only **measurable** statements — a number, %, ratio, ₹/\$ figure or a dated milestone. Generic or aspirational commentary is rejected. One promise per row, with a verbatim ≤ 25 -word quote.

How status is judged (deterministic rules — the model only retrieves)

- **MET** — delivered or exceeded the target
- **PARTIAL** — close but below target / a milestone slipped within grace
- **MISSED** — failed, incl. a date the company later pushed past the promised window
- **NYT** — outcome not yet reported within the verification window (excluded from scoring)

Confidence & the credibility score

H = hard numeric · **M** = directional · **L** = aspirational. Credibility = confidence-weighted delivery over testable promises (MET=1, PARTIAL=0.5, MISSED=0; H=1.0, M=0.8, L=0.6); bands A $\geq$ 75 B $\geq$ 60 C $\geq$ 45 D $\geq$ 30 E<30.

The verification window

Outcomes are verifiable only through **Q1FY27** (reported 2026-07-01). Later targets are therefore **NYT**. *Full retrieval · openai, mistral, gemini, groq.*
