01 Executive Dashboard

Mostly delivered on testable promises — chiefly execution; 196 later targets still not yet testable.

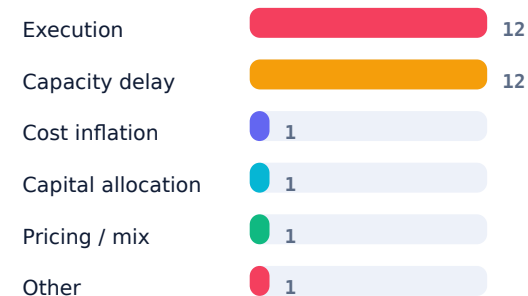

STATUS OF ALL 337 COMMITMENTS

COMMITMENTS BY REPORTING QUARTER

ROOT CAUSE OF MISSES & SHORTFALLS

Mostly delivered on testable promises — chiefly execution; 196 later targets still not yet testable.

Of the 8 dated commitments that came due, 4 landed on time and 4 slipped right. The slippage timeline is overleaf.

CREDIBILITY SIGNALS — WHERE THE RECORD SHOWS

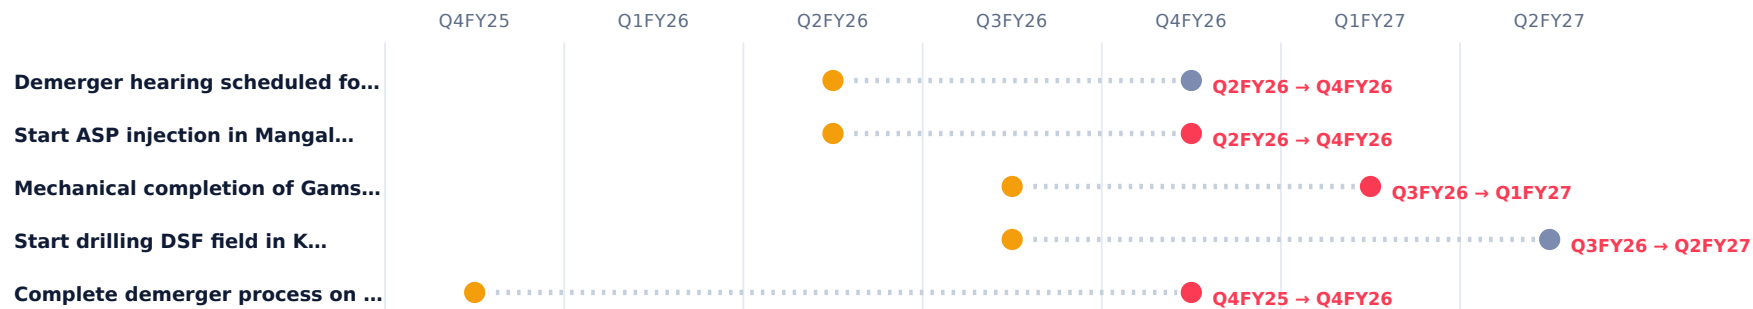

- 70% of the verdict rests on hard Tier-1 (binary) outcomes.
- Wide beats on 5/8 guided metrics — a conservative bar.
- 7% of explained misses blamed on external factors.

02 Deadline Slippage & Execution Momentum

Each row is one dated commitment: the amber dot is where it was **promised**, the second dot is where it **actually landed** (its colour is the verdict). Below, the reported EBITDA and margin trend.

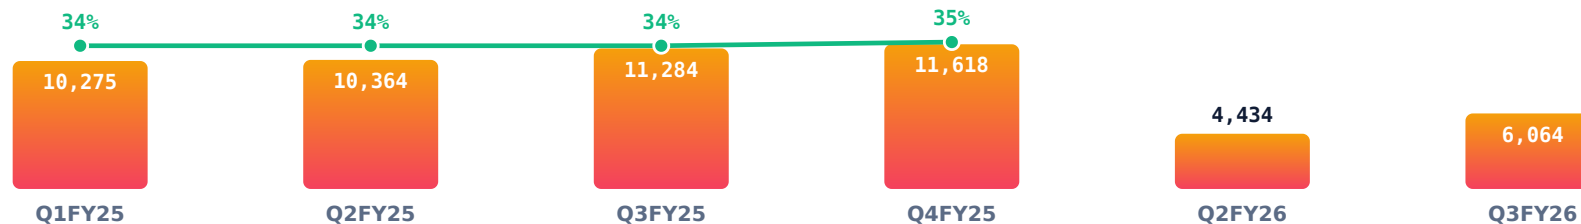

TIMELINE COMMITMENTS — PROMISED → WHERE IT ACTUALLY LANDED

● **Promised date** ● **Where it landed** — dot colour is the verdict (green met · amber partial · red missed) — the slip

Q1FY25 · Q1FY25 transcript

ESL steel ramp-up to 3.5 million tons per annum by FY25

TARGET	3.5 Mtpa steel capacity by FY25
ACTUAL	ESL steel capacity was 1.34 MTPA in FY25, below the 3.5 MTPA target
VARIANCE	1.34 vs 3.5 million tons per annum

Why: Unplanned shutdowns and infrastructure handling issues limited sustained capacity

Execution

MISSED

Q1FY25 · Q1FY25 transcript

ESL steel ramp-up to 3.5 million tons per annum by end FY25

TARGET	3.5 Mtpa steel capacity by FY25-end
ACTUAL	Run rate of 3 MTPA achieved but not sustained due to unplanned shutdowns and infra handling; issues expected to be resolved soon
VARIANCE	3 vs 3.5 million tons per annum

Why: Unplanned shutdowns and infrastructure handling caused inability to sustain 3 MTPA run rate

Execution

MISSED

Q1FY25 · Q1FY25 transcript

FACOR ferro chrome capacity increase to 150,000 tons per annum in FY25

TARGET	150,000 tpa FACOR capacity
ACTUAL	Ferro Chrome production reached 24,000 tpa in Q3 FY26, below the 150,000 tpa target for FY25
VARIANCE	24,000 vs 1,50,000 tons per annum

Why: Q2'26 performance impacted due to a one-month planned shutdown

Capacity delay

MISSED

Q1FY25 · Q1FY25 transcript

Iron ore FY25 production target of 12 million tons per annum plus 1 million ton value-added business

TARGET	12 Mtpa plus 1 Mtpa value-added iron ore production FY25
ACTUAL	Iron ore production was 5.3 MTPA and value-added pig iron production was 0.9 MTPA in FY25.
VARIANCE	5.3 vs 12 million tons per annum

Why: null

Execution

MISSED

Q1FY25 · Q1FY25 transcript

Lanjigarh refinery Train 1 full capacity by Q3 FY25

TARGET	3.5 Mt capacity by Q3 FY25
ACTUAL	Only 1.5 Mt train commissioned by Q4 FY25, not full 3.5 Mt capacity by Q3 FY25
VARIANCE	1.5 vs 3.5 million tons

Why: In progress; commissioning of second train started, targeting 4 Mt run rate by year-end

Execution

MISSED

Capacity delay

MISSED

Q4FY25 · Q4FY25 transcript

Start Sijimali mine operations by Q2FY26 with full ramp-up by Q4FY26

TARGET start Q3FY26, full ramp-up by Q4FY26

ACTUAL Sijimali mine commissioning re-set to 1HFY27

VARIANCE **1 vs 3**

Why: Delay due to waste stripping catch-up at Gamsberg open pit, impacting schedule

Capacity delay

MISSED

Q4FY25 · Q4FY25 transcript

Maintain dividend yield at about 6% for Vedanta Resources

TARGET ~6% dividend yield

ACTUAL Dividend yield lowered to almost 4% yield, below the ~6% target

VARIANCE **5 vs 6 %**

Why: Lower dividend yield due to managing VRL cash flow and contractual brand fee obligations

Capital allocation

MISSED

Q4FY25 · Q4FY25 transcript

Reduce alumina cost to around \$340-350 per ton in Q1FY26

TARGET \$340-350/t in Q1FY26

ACTUAL Alumina cost was around \$800 per ton in Q3FY26, above target range for Q1FY26.

VARIANCE **800 vs 340-350 USD/t**

Why: Higher alumina cost due to LME price surge and captive production costs exceeding market price.

Pricing / mix

The Track Record — 141 Testable Promises / part 6 of 24

Commitments whose verdict is already in the documents, ordered **worst to best**. The other 196 promises are forward-dated and remain Not Yet Testable.

MISSED

Q4FY25 · Q4FY25 transcript

Reduce power cost by \$40-45 per ton in Q1FY26

TARGET \$40-45/t reduction in Q1FY26

ACTUAL Power cost increased by \$75 per ton in Q2FY26, offset by other cost reductions.

VARIANCE **75 vs 40-45 USD/t**

Why: Power cost rose due to planned power plant shutdown and maintenance.

Capacity delay

MISSED

Q1FY26 · Q1FY26 presentation

Expand BALCO smelter and VAP capacity, Lanjigarh refinery to 5 MTPA, increase VAP to 2.5 MTPA, debottleneck Lanjigarh to 6 MTPA, smelter capacity to 3.1 MTPA and VAP to 2.8 MTPA

TARGET BALCO smelter and VAP expansion, Lanjigarh refinery 5 MTPA, VAP 2.5-2.8 MTPA, Lanjigarh debottleneck 6 MTPA, smelter 3.1 MTPA

ACTUAL BALCO smelter ramped to 2.8 MTPA; Lanjigarh refinery close to 5 MTPA run rates

VARIANCE **2.8 vs 5-6 MTPA**

MISSED

Methodology & Sources

What qualifies as a commitment

Only **measurable** statements — a number, %, ratio, ₹/\$ figure or a dated milestone. Generic or aspirational commentary is rejected. One promise per row, with a verbatim ≤ 25 -word quote.

How status is judged (deterministic rules — the model only retrieves)

- **MET** — delivered or exceeded the target
- **PARTIAL** — close but below target / a milestone slipped within grace
- **MISSED** — failed, incl. a date the company later pushed past the promised window
- **NYT** — outcome not yet reported within the verification window (excluded from scoring)

Confidence & the credibility score

H = hard numeric · **M** = directional · **L** = aspirational. Credibility = confidence-weighted delivery over testable promises (MET=1, PARTIAL=0.5, MISSED=0; H=1.0, M=0.8, L=0.6); bands A $\geq$ 75 B $\geq$ 60 C $\geq$ 45 D $\geq$ 30 E<30.

The verification window

Outcomes are verifiable only through **Q4FY26** (reported 2026-04-01). Later targets are therefore **NYT**. *Full retrieval · openai, mistral, gemini, groq.*
